Short Bio After years of code battle in the Israel Defense Forces and the startup world, I'm seeking a new technical/product role at one of Silicon Valley's emerging startups. I'm a musician as well as a tech-geek; to me, both represent creation as art.

Current Position

Co-Founder & CEO of Vidit.fm, Tel Aviv/San Francisco   September 2011 – Current

Live Demos: Vidit Editor, Vidit Cubes Technology or on Gariany.com (under tech section)

Vidit is a platform for the recreation of events, using simple user-generated videos and the power of crowdsourced content. Among the basic features we offered were audio-based video synchronization, multi angle video player, smooth cuts and smart automatic audio/video directing.

Led operations, fund raising and product development. In addition, I developed the video editor, backend platform and iOS mobile application.

In 2012, Vidit was chosen out of 200 companies to take part in the first batch of the highly selective Microsoft Ventures Accelerator program. Vidit was also chosen to take part in other programs such as The Junction and Young & Rubicam Spark Plug program. After being featured in TechCrunch, TheNextWeb Vidit collaborated with artists around the world in groundbreaking projects.
